## HeidelbergCement expands its ready-mixed concrete business in the Czech Republic

HeidelbergCement has acquired six ready-mixed concrete plants and one sandpit via its Czech subsidiary Českomoravský beton, a.s. from Kámen Zbraslav, a.s. in the Moravia region in the Eastern part of the Czech Republic. All plants have a well-established residential and commercial customer base around the city of Brno, with a high demand for sustainable building solutions.

With this step, HeidelbergCement continues to drive forward its portfolio optimisation programme and further expands its footprint in the region. HeidelbergCement now operates 80 ready-mixed concrete plants in the Czech Republic and two in Slovakia. The expected annual production of the newly acquired plants is around 85 thousand cubic metres of concrete.

### About HeidelbergCement

HeidelbergCement is one of the world's largest integrated manufacturers of building materials and solutions, with leading market positions in aggregates, cement, and ready-mixed concrete. Around 51,000 employees at more than 3,000 locations in over 50 countries deliver long-term financial performance through operational excellence and openness for change. At the center of actions lies the responsibility for the environment. As forerunner on the path to carbon neutrality, HeidelbergCement crafts material solutions for the future.
